I put a couple of big switching transistors in the vibrator body for the TBY supply. It's now an L-R multivibrator. Makes nice volts, but lots of hash. Not enough noise filtering in the circuit. It's cramped in there- I'm thinking of putting the filtering in the ground return at the vibrator socket, rather than trying to filter the individual legs of the primary or each of the four voltage outputs. Any thoughts?

Beautiful photos, splendid gift you are providing to radiofans by such articles. I haven't listened to any freqs outside SWBC for years, but i recall CKN pounding in on CW on any receiver, from a KnightKit regen to the latest resurrected surplus black box.

P.S. Does anyone have a photograph of the original battery pack?
I'd like to build a replica with a 6 volt lead acid inside and
a series diode or two to bring the output voltage down some.

Lessee, not tested means you have no idea whether it works or not, so you
really don't care enough about this equipment to determine its value.

Best offer means you *really* don't care what it sells for.

OK, I'll bid \$1.00, including shipping.

Because I don't know what it is, but it has a very low mystery value.

Regards,
Bill Hawkins

Sounds like what you could use with a B&W 5100, which is a 75 ohm rig.
Might play with some surplus RG-59 tv coax.

Short story: Where I grew up in the early 70's there were some alley's with plenty of old TV coax just dangling down from the roofs of office bldgs. This must have been shortly after cable tv obsoleted the rooftop aerial. If I ever needed some coax I'd just go into an alleyway, find a dangler and give it a good yank, coil it up and go home. Nobody else was using it ;))

Hello,

I have a few items I need to clear out. Pick up only
20 miles south of downtown Houston, TX.

CV-116 diversity RTTY converter used with R-390A
setup. Complete with manual, untested. Free.

MD-239A RTTY keyer for T-368 setup. Complete,
untested. Free

T-195 transmitter. Was working but with low output.
With manual and power cable. \$150.

R-1051's. Have two for \$150 each. Complete but
untested. Have manual copies but no power cables.

Racal R-153A diversity receiver. This is a rack mount
receiver that looks similar to the RA-17 but is about
18 inch panel height and has a separate rack mount
power supply. It is a dual channel diversity receiver....
it has 2 complete RF-IF-Audio chains fed by the same
set of oscillators. One channel works, one doesn't.
With manual copy. \$400.

B&W 5100 transmitter. Works but has low output.
Fairly good cosmetic shape. With manual copy. \$200.

Johnson Ranger - II. This is a "put it together" project.
Case, front panel, vfo bezel, and xtal knob/door have
been professionally refinished. Only blemish is a scuff
mark on the meter that could be polished out. Complete
but needs to be put together. With manual copy.
\$450 picked up or will pack in two boxes and ship
Fed-x ground in CONUS for an additional \$50.

E-mail me at plmills@attglobal.net or phone me at
home 281-482-2763 before 8 p.m. central or call
my sell phone 281-910-2763 days.

thanks & 73,
Phil

Friends, family and fellow radio collectors,

Linda and I are moving to an antenna friendly location. We will still be
in Wichita but the move will require my shutting down both e-mail and
radio operations until December 15th. At that time I will have a new
e-mail address, postal address and phone number (no not the county jail).
Contact you again in three weeks and four days.

Sincerely,
Roger Klingman

After having spent numerous hours of my adult life this month removing
several, at last count ----6 ham modifications to a BC-348, I now
find that I am in need of the following:

1 each MVC-AVCcontrol, it is a dual pot back to back. 20K and 350K

2 each, spring dirt covers for the phone jacks

1 each , the elusive and mysterious receiver power connector, an 8 pin
male.

And last but not least a DM-28 dynamotor.

Thanks Breck K4CHE

Dover, Delaware,

annt nutten in Dover, except chickens, a NASCAR track and hams that cant solder.

PREFER TO TRADE BUT WILL SELL IF NECESSARY

DX-100 Parts unit. Dirty but all there except cabinet. One unoriginal = front panel hole. Some knobs are broken or deformed. See wanted list = below.

BC-451A SCR-274N control box. I have 2 of these. One is NOS in the box. = See wanted list below.

Also available: Original NOS manual for Navy WWII-era JP-2 Sound = Receiving Equipment.

Most Wanted List

TS-164/AR cabinet, with or w/o the BC-221 Freq Meter. Modified is fine. =

Can be missing the front "door". I just need the cabinet.

GP-7 Accessories: Tuning unit F and CAY-23219 pilot's control box.

Wireless Set Number 19 Mark II tank radio accessories: "A" set antenna, =

any antenna cables, the interphone amplifier and the linear = amplifier.

ARB receiver canvas cover and dynamotor.

ARC-5 single receiver rack shockmounts (need two) wanted. I have the = racks,

just need the shockmounts.

Eimac 50T, 75T or 150T tubes. Also consider RCA 808 as a sub.

Book: F. C Jones, "Cathode Modulation" published in the 1930's.
Book: Don Wallace, W6AM, Amateur Radio's Pioneer

Any help appreciated.
73, Don Merz, N3RHT

Chuck,
Friends, family and fellow radio collectors,

Linda and I are moving to an antenna friendly location. We will still be in Wichita but the move will require my shutting down both e-mail and radio operations until December 15th. At that time I will have a new e-mail address, postal address and phone number (no not the county jail). Contact you again in three weeks and four days.

Sincerely,
Roger Klingman
K0RMK
